

JBS Group of Companies are based in the USA and UK. Our architectural security glass uses the best available technology to provide best in class results for glass products.

Projectile Resistant Wall Systems

Bullet proof clear panels for high rise building construction with mounting frames.

Clear panel noise reduction.

Hurricane resistant, storm proof, designed to withstand high velocity projectiles and manual attacks such as hammer blows.

Glass can provide a combination of properties such as protection & soundproofing.

Products are USA UL rated with product testing numbers and certification.

For special projects JBS can perform test validation/qualification tests on the panels so that the client can witness the performance in a real live fire scenario.

Architectural Security Glass

JBS Group USA manufactures high quality architectural and security glass with outstanding optical properties. As well as traditional architectural and security glass our 5th dimensional structures can be incorporated into some of our glass products making them the most robust security glazing available for vehicles, buildings, military installations and many other applications.

Product Information

Re-moltinized, purified base glass composition.

Interlayers are pressure cured and fused.

26 layer construction, impact resistant.

Liquid poly carbon fibre interlayers.

Sound, heat thermo and impact barriers.

Interior high rise building systems can be outfitted with our carbon shields to prevent impact debris.

JBS projectile systems can also be outfitted for safe rooms.

Security & Protection

JBS architectural security glass is manufactured at our state of the art manufacturing facility in Fort Lauderdale Florida USA. Products include bullet & blast resistance, hurricane resistant, physical security and glass for high risk installations.

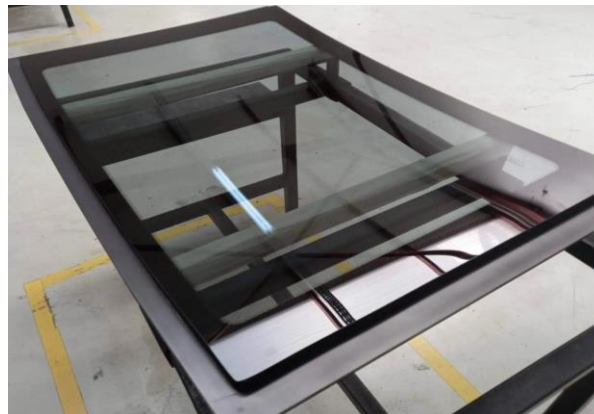

Our ballistic capabilities are breaking new records for protection. They exceed any product available on the market today and withstand multiple shots in clear, hard armor and flexible solutions.

Innovative solutions are our speciality achieving record breaking results for our ballistic glass panels.

A global company - JBS operate in 80+ countries around the world.

Safety is a choice you make – choose JBS architectural security and bullet proof glass products
