

JBS Group of Companies are based in the USA and UK. Our safe rooms, ballistic walls & windows use the best available technology to provide best in class results for personnel and asset security.

JBS safe rooms have passed ballistic tests that allow it to protect individuals in even the most hostile situations. Due to its unique modular and lightweight design, our safe room can be installed quickly with little disruption into most buildings. It has the added benefit of being cost effective due to the fact that it can be easily relocated when a threat subsides

Safe rooms typically provide food and water supplies, effective communication channels to be able to communicate with the outside world, a proper system of ventilation, electric power, CCTV, first aid kit and noise reduction properties.

Products are manufactured in the USA, UL certified with product testing numbers and certification.

### **Safe Rooms, Ballistic Walls & Windows**

JBS Group USA manufactures high quality safe rooms and clear ballistic walls / windows with outstanding optical properties. As well as traditional architectural and security products our 5<sup>th</sup> dimensional structures can be incorporated into products making them the most robust security systems available for safe rooms, ballistic walls & windows.

### **Product Information**

Working with diplomatic and high net worth Individuals security teams, JBS have extensive experience in establishing secure and protected safe rooms in diplomatic, high value homes, vessels, government and consular buildings.

We provide a complete turnkey service from installation of ballistic walls and reinforced glass both from the start of a design and construction project into new buildings, as well as retro-fitting protective elements into established properties.

The intricate coordination needed for this level of protection is complex hence JBS work closely with the client to provide a best in class service.

Our ballistic capabilities are breaking new records for protection. They exceed any product available on the market today and withstand multiple shots in clear, hard armor and flexible solutions.

JBS will ensure a full works schedule, to include overall project management ensuring the project is delivered on schedule and within budget.

JBS also perform test validation/qualification tests on the panels so that the client can witness the performance in a real live fire scenario.

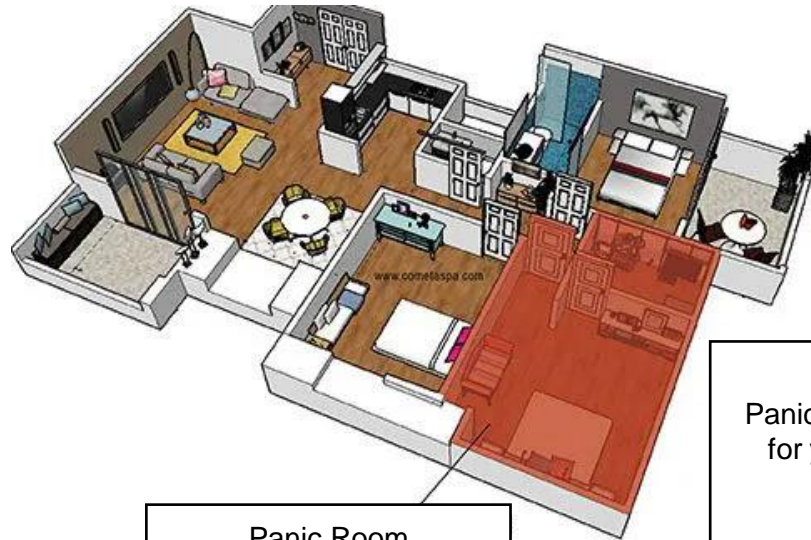

**A global company** - JBS operate in 80+ countries around the world.

## *Safety is a choice you make – choose JBS Safe Rooms, Ballistic Walls & Windows*

A useful space - this safe room with bunk beds is also a hang out room for kids and teenagers. It can be used all year round.

Panic Room

Panic Room – a safe place for you, your family and employees
